# MAPTSOFT

Mining Asset Performance Tracking Software

## MAPTSOFT ENABLES YOU TO MANAGE YOUR SPLICES MORE EFFECTIVELY. DATA IS INSTANTLY AVAILABLE FOR MANAGEMENT AND MAINTENANCE TEAMS.

Tag each splice using High-Temp RFID tag and manage these splices digitally through Mobile App. Tailored inspections and maintenance regimes for splices are designed and operated from rugged smart phone. The user can effectively capture splice inspection and maintenance details, including images, and digitally store these for effective management and control.

# SPLICE MANAGEMENT

### TRACK SPLICES

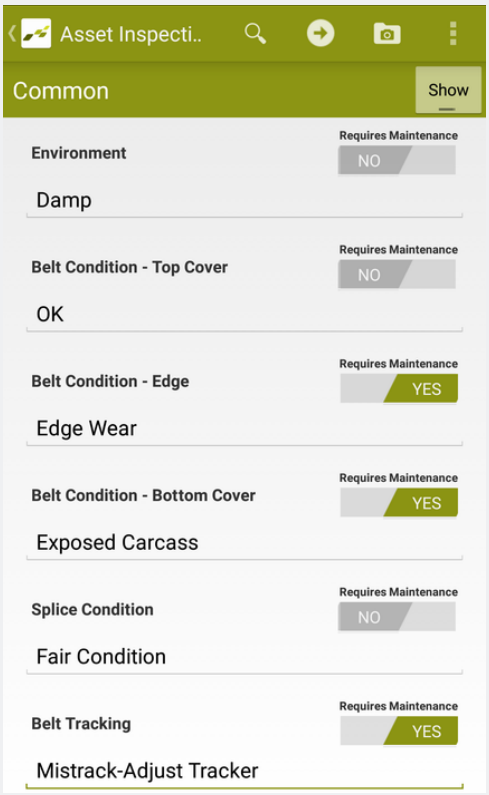

- Capture & monitor essential splice information
- Installation date & expected lifespan
- Inspection dates & intervals
- Splice type
- Splice manufacturer & installation co.
- Environmental conditions

## SCHEDULE INSPECTIONS & MAINTENANCE ACTIONS

- Schedule splice inspections & replacements
- Allocate tasks to users or teams
- Alerts for any splices missed
- Plan for splice replacements
- Exception tracking & follow up

## INTELLIGENT IN-FIELD TOOLS

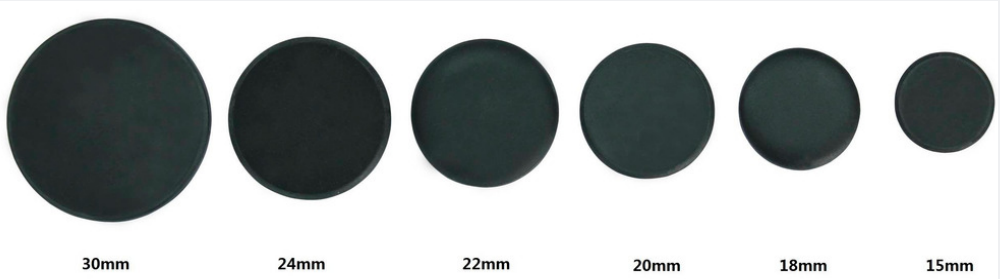

# CONTROL SPLICES

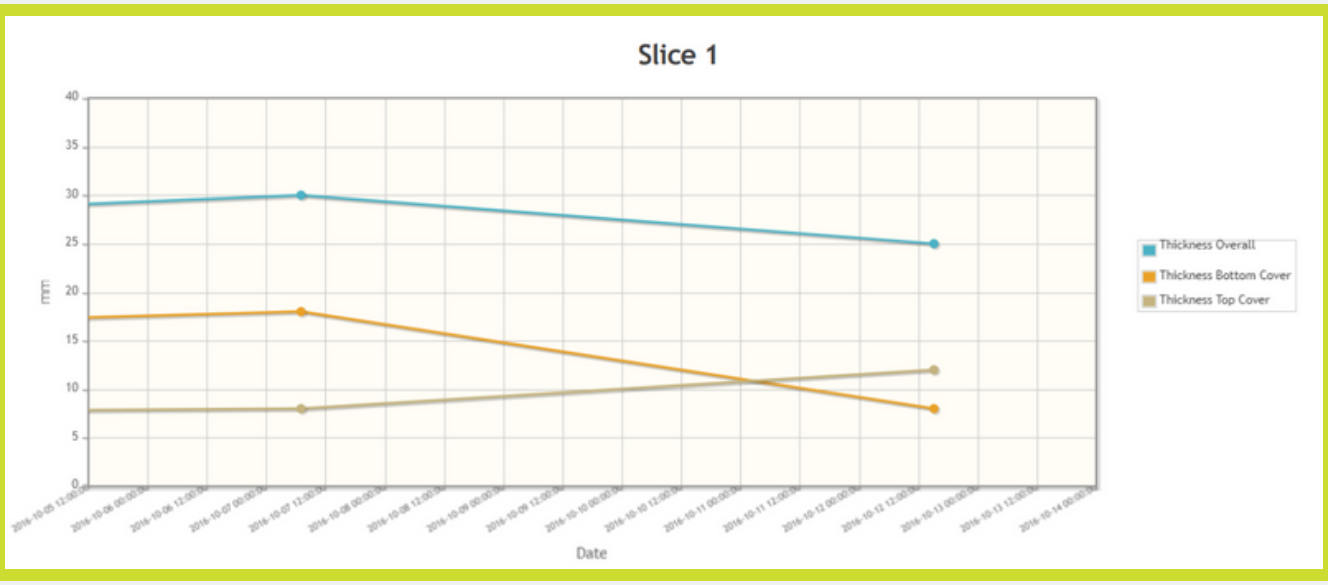

**All splices that are tagged are controlled**

- System ensures splices are inspected via tag scan
- Reliably manage swap outs
- Track lifespan of splices
- Gather pertinent splice information digitally
- Gather valuable historical data
- Speed up information relating to splices

High Temp RFID tags withstand up to 200 Deg C

## SPLICE THICKNESS GRAPHING
